## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

This application contains claims directed to the following patentably distinct species of the claimed invention:

1. Apparatus for separating non-magnetic values from a source material using a magnetic separation assembly and endless conveyors, claims 1-8.
2. Apparatus for separating non-magnetic values from a source material using a magnetic separation assembly and fluid connection channels, claims 9-20.
3. Method of dry separation of non-magnetic metal values from a source material by isolating strata with an underlying conveyor, claims 21-22.
4. Method of dry separation of non-magnetic metal values from a source material by isolating strata with a pair of top and bottom conveyors, claims 23-24.
5. Method of wet separation of non-magnetic metal values, claim 25.
6. A mineral separation assembly, claim 26.
7. Apparatus and method for separating a target material from a source material using a carrier and a magnetic field generator by virtue of induction, claims 27-43.
8. Method for separating and disposing of a toxic substance, claims 44-45.
9. Apparatus and method for separating non-magnetic substances using a plurality of magnetic separation systems and a scraper, claims 46-57.

These groups are distinct by virtue of the mutually exclusive characteristics contained therein.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no generic claims exist.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
